

30-Day Java + Selenium Automation Tester Roadmap

Core Java (Day 1 – Day 10)

Day 1

- Version 1, 2, 3
- Methods
- Objects
- Local Variables
- Global Variables

Day 2

- Version 4, 5
- Constructors
- Parameterized Constructors

Day 3

- Version 6, 7
- Method Overloading
- Constructor Overloading

Day 4

- Version 8, 9, 10
- Method Overriding
- this Keyword

Day 5

- Version 11
- Static Variable
- Static Method
- Static Block

Day 6

- Version 12, 13
- Single Inheritance
- Multilevel Inheritance
- Hybrid Inheritance

Day 7

- Version 14, 15, 16, 17, 18
- If Condition
- Nested If
- For Loop
- While Loop

Day 8

- Version 19, 20
- Abstract Class
- Interface

Day 9

- Version 21, 22
- Multiple Interface
- Arrays

Day 10

- Version 23, 24, 25
 - Exception Handling
 - List Collection
 - Set Collection
 - String
 - StringBuilder
-

Selenium (Day 11 – Day 20)

Day 11

- Selenium Introduction
- WebDriver Setup
- ChromeDriver Setup

Day 12

- Browser Commands
- Navigation Commands

Day 13

Locators

- id
- name
- className
- tagName

Day 14

- LinkText
- Partial LinkText
- XPath Basics

Day 15

- Relative XPath
- Contains()
- Text()
- CSS Selector

Day 16

WebElement Methods

- click()
- sendKeys()
- clear()
- getText()
- getAttribute()

Day 17

- Dropdown
- Checkbox
- Radio Button

Day 18

- Alerts
- Frames
- Window Handling

Day 19

Waits

- Implicit Wait
- Explicit Wait
- Fluent Wait

Day 20

- Actions Class
 - Mouse Hover
 - Double Click
 - Right Click
 - Drag & Drop
-

TestNG + Framework + SQL + API + Jenkins (Day 21 – Day 30)

Day 21

- TestNG Introduction
- @Test
- @BeforeMethod
- @AfterMethod
- @BeforeClass
- @AfterClass

Day 22

- Assertions
- Hard Assert
- Soft Assert

Day 23

- TestNG XML
- Priorities
- Groups
- DependsOnMethods

Day 24

- DataProvider
- Parameterization
- Parallel Execution

Day 25

- Cross Browser Testing
- Chrome
- Firefox
- Edge

Day 26

- Maven
- pom.xml
- Dependencies
- Build Lifecycle

Day 27

- Git
- GitHub
- Clone
- Pull
- Add
- Commit
- Push

Day 28

- Page Object Model (POM)
- Framework Structure
- Utility Classes

Day 29

- Apache POI
- Excel Reading
- Data Driven Testing
- Extent Reports

Day 30

SQL Basics

- SELECT
- INSERT
- UPDATE
- DELETE
- JOIN

API Testing Basics

- GET
- POST
- PUT
- DELETE
- Status Codes

Jenkins Basics

- Job Creation
- Build Trigger
- Execute TestNG Suite

Real-Time Framework Questions

- StaleElementReferenceException
- NoSuchElementException
- TimeoutException
- ElementClickInterceptedException

Final Automation Framework

AutomationFramework

- pages
- tests
- utilities
- reports
- screenshots
- testdata
- pom.xml

Framework Features:

- Selenium WebDriver
 - TestNG
 - Maven
 - GitHub
 - POM
 - Apache POI
 - Extent Reports
 - Data Driven Testing
-

Interview Focus (Must Prepare)

Core Java

- OOPs Concepts
- Collections
- Exception Handling
- String vs StringBuilder

Selenium

- Locators
- XPath
- Waits
- Window Handling
- Frames
- Alerts

TestNG

- Annotations
- Assertions
- DataProvider

Framework

- POM
- Maven
- Git
- Extent Reports

SQL

- Joins
- Queries

API

- HTTP Methods
- Status Codes

Jenkins

- Build Execution

Project

- Explain Framework
- Explain Your Role
- Challenges Faced
- Defect Reporting Process
